Lecture 16 Worksheet

Question 1

Write a Jack program that calls a recursive function to calculate the 7^{th} Fibonacci number:

```
class Main
{
     function int recfib(int x)
     {
         // your code here
```

```
function void Main()
{
    // your code here to call recfib(7)
```

```
}
```

Question 2

T	n groups (1.	. 1		C . 1	T 1			1	
- 11	n araline	dicclice	tha tag	turac a	ttha	I a clair	nraara	mmina	langi	1200
			1110 100	11 111 2 5 01		141 K	וענונונו	1111111111	IAHVI	IAVE
	II SI Oupo '	albeabb	CIIC ICC	icui co o	LIIC	Jucis	P1 051 4		IUIIS	u, c.

1.	What are	the best	features	of the	Jack pro	gramming	language '	?
----	----------	----------	----------	--------	----------	----------	------------	---

 $2. \ \ What are the odd features of the Jack programming language ?$

3. What are the worst features of the Jack programming language ?
